PROFESSIONAL SUMMARY

Multidisciplinary Game Developer and Software Developer with 10+ years of experience building games, interactive applications, real-time experiences and digital products. Strong background in Unreal Engine, Unity, C#, gameplay systems, Level Design, UI/UX, VR/XR, motion capture and Virtual Production, complemented by Flutter and cross-platform software experience.

CORE STRENGTHS

- Shipped commercial game — **A Jornada**, built end-to-end for Rede Novo Tempo
- 20K+ downloads — Character Craft 5.5e
- 110K+ downloads — NTPlay
- 60K+ monthly active users — Radio NT
- 10+ years across games, software, education and real-time experiences
- Technical publications on Unreal Engine procedural generation

PROFESSIONAL EXPERIENCE

REDE NOVO TEMPO DE COMUNICAÇÃO

Game Developer / Game Designer / Software Developer / Virtual Production Technical Lead

Brazil · Mar 2018 – Present

- Developed games, interactive applications and cross-platform software, contributing to game design, gameplay, UI/UX, production and launch support.
- Worked with Unreal Engine and Aximmetry for virtual environments, motion capture, rendering, live operation and interactive event workflows.
- Operated and recorded motion-capture sessions using Rokoko workflows and integrated captured performance into real-time character experiences.
- Led development and maintenance of NTPlay and Radio NT, including architecture, UI/UX, APIs, Firebase, publishing and analytics.

CODEBUDDY

Developer, Game Development Teacher & Educational Content Creator

Brazil · 2016 – 2018

- Taught programming, game development, game design, app development, robotics and gamification.
- Created educational and gamified learning content.

SELECTED PROJECTS

A JORNADA

Rede Novo Tempo · Commercial release · Sole developer

Turn-based puzzle game commissioned and launched by broadcaster Rede Novo Tempo — built end-to-end by me. Handled all gameplay programming and the in-engine build, and designed every level, puzzle layout, mechanic, progression path and quest. Also directed audio and integrated assets (soundtrack selection, 3D models), with 2D art by a dedicated artist. Now discontinued.

PULSE HERO

Game Designer / Developer · Current launch

Fitness RPG combining real-world activity with character progression, combat and gamification. Current work spans systems design, progression, UX, development and launch.

CHARACTER CRAFT 5.5E

Creator & Lead Developer · 20K+ downloads

Cross-platform RPG companion built with Flutter, Firebase and WebSockets. Designed character systems and real-time game rooms and managed authentication, publishing and live product evolution.

TRACBEL VR

Unreal Engine · Multiplayer VR · Meta Quest

Real-time multiplayer VR experience with user management, networking, replication and dedicated-server support.

TECHNICAL PROFILE

Game: Unreal Engine, Unity, C#, gameplay systems, multiplayer, VR/XR, Meta Quest

Design: Level Design, puzzle design, mechanics, quests, progression, UI/UX

Real-Time: Unreal Engine, Blueprints, Aximmetry, Vive Mars, Rokoko, Virtual Production

Software: Flutter, Dart, Firebase, WebSockets, REST APIs, Android, iOS, macOS, Windows

Languages: C#, Dart, JavaScript/TypeScript; practical C++ knowledge in Unreal; Python

RENAN MACÊDO

GAME DEVELOPMENT · REAL-TIME · VIRTUAL PRODUCTION

Selected technical background across game development, real-time production, software engineering and interactive media.

REAL-TIME, MOCAP & VIRTUAL PRODUCTION

- End-to-end real-time production support, from scene setup and tracking through live operation and recording.
- Unreal Engine Blueprint development for interactive and real-time workflows.
- Aximmetry + Vive Mars tracking for live events and virtual production.
- Rokoko motion capture workflows with performers, from recording setup to real-time character integration.
- Chroma-key recording and virtual environment integration for commercial content.

SOFTWARE & PRODUCT DEVELOPMENT

- Flutter/Dart cross-platform development for Android, iOS, macOS and Windows.
- Firebase, WebSockets, REST APIs, JSON, authentication, push notifications and analytics.
- Architecture, debugging, publishing, live-product maintenance and continuous iteration.

EDUCATION

Technology Degree in Digital Games

Universidade FUMEC · 2013 – 2016

LANGUAGES

Portuguese: Native | **English:** Advanced

PROFESSIONAL POSITIONING

Game Development: experience from concept and prototyping through level design, mechanics, quests, gameplay implementation, testing, launch and live-product iteration.

Real-Time / VP: experience operating real-time environments for events and recorded productions, combining Unreal Engine, Aximmetry, tracking, mocap and Blueprint development.

Software: strong production background in cross-platform products, architecture, backend integration, publishing and maintenance.

Collaboration: comfortable working across technical, creative, production and educational contexts.

PUBLICATIONS

80 Level — Procedural Medieval Village Generator Set-up in UE5

80 Level — Experimenting with UE5.2's Procedural Content Generation Framework
