

# RENAN MACÊDO

FLUTTER DEVELOPER · CROSS-PLATFORM SOFTWARE ENGINEER · PRODUCT BUILDER

Jacareí, São Paulo, Brazil | English: Advanced

Portfolio    LinkedIn    GitHub    ArtStation

## PROFILE

Flutter Developer and multidisciplinary Software Developer with 10+ years of experience delivering cross-platform applications, real-time products and digital experiences. Strong background in Flutter, Dart, Firebase, WebSockets, REST APIs, UI/UX, store publishing and live-product maintenance. Led streaming products used by tens of thousands of users and created Character Craft 5.5e with 20,000+ downloads.

## SELECTED IMPACT

- 60K+ monthly active users - Radio NT
- 110K+ combined downloads - streaming apps
- 20K+ downloads - Character Craft 5.5e
- Firestore -> WebSocket migration for real-time game rooms
- Android, iOS, macOS and Windows delivery

## CORE EXPERTISE

- Flutter & Mobile: Flutter, Dart, Android, iOS, macOS, Windows, responsive UI/UX and store publishing.
- Backend & Real-Time: WebSockets, Firebase Auth, Firestore, Cloud Messaging, App Check, REST APIs, JSON and synchronization.
- Product Delivery: architecture, analytics, debugging, performance, feature evolution, Git and live-product maintenance.

## EXPERIENCE

### REDE NOVO TEMPO DE COMUNICAÇÃO

Flutter Developer / Software Developer

Brazil · Mar 2018 - Present

- Led redevelopment and continuous evolution of NTPlay and Radio NT, cross-platform Flutter applications for video and audio streaming.
- Owned application architecture, UI/UX, APIs, Firebase, authentication, push notifications, analytics, store publishing and maintenance.
- Radio NT supports 60K+ monthly active users; the streaming ecosystem has surpassed 110K combined downloads.

### CODEBUDDY

Developer, Educational Content Creator & Teacher

Brazil · 2016 - 2018

- Developed the teaching platform used by the school units.
- Taught programming, app development, game development, robotics and gamification.

### FREELANCE / INDEPENDENT DEVELOPMENT

Mobile & Game Developer

- Developed independent mobile and game projects, including Character Craft 5.5e and client/contract work across apps, games and gamified experiences.
- Selected work included GameBuddys for CodeBuddy, an educational game for Sistema FIEMG, Des-Ligados for Datte, and a gamified solution for Orange Class.

## SELECTED PRODUCTS

### CHARACTER CRAFT 5.5E

20K+ downloads

Cross-platform RPG companion for Android, iOS, macOS and Windows. Built JSON-driven character systems and real-time game rooms; migrated synchronization from Firestore to WebSockets.

### NTPLAY & RADIO NT

60K+ MAU · 110K+ downloads

Video and audio streaming applications rebuilt in Flutter. Architecture, APIs, Firebase, authentication, notifications, UI/UX, analytics, publishing, debugging and ongoing maintenance.

### PULSE HERO

Fitness RPG · Current launch

Mobile RPG built around fitness and gamification. Demonstrates product ownership, Flutter development, RPG systems, progression, game design and launch-oriented development.

### MINHA IGREJA

Prototype

Flutter mobile and web prototype with member management, communication features and real-time cloud synchronization.

## TECHNICAL SKILLS

- Flutter, Dart, cross-platform architecture
- Firebase: Firestore, Auth, Cloud Messaging, App Check
- WebSockets, REST APIs, JSON data modeling
- Android, iOS, macOS, Windows
- UI/UX, analytics, push notifications, app lifecycle
- Google Play and App Store publishing
- C#, JavaScript/TypeScript, Unity, Unreal Engine

## PUBLICATIONS

80 Level - Procedural Medieval Village

80 Level - UE5.2 PCG Framework

## EDUCATION

Technology Degree in Digital Games

Universidade FUMEC · 2013 - 2016

# RENAN MACÊDO

## PRODUCT & SOFTWARE DEVELOPMENT

Additional context for software-focused applications

---

## PRODUCT OWNERSHIP

Experienced across the full product lifecycle: architecture decisions, prototyping, UI/UX implementation, backend integration, release workflows, analytics, debugging, store publishing, live-product maintenance and continuous feature evolution.

## REAL-TIME SYSTEMS

- Designed and maintained real-time synchronization systems for Character Craft.
- Migrated online game-room synchronization from Firestore to WebSockets.
- Worked with authentication, notifications, App Check, cloud data and online/offline synchronization.
